REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-13, 17-19, and 24-26 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach a method and apparatus of switching notification characteristics of a mobile device by determining if an event start time and end time and determining whether it is the start time. If it is the start time finding a notification characteristic associated with the start time and determining if the notification characteristic is different from a prevent notification characteristic. If notifications are different, modifying the notification characteristic during the event and saving the prevent notification characteristic.

Rydbeck et al. (6,574,471), in view of Pierry et al. (US 2001/049275 A1), cited in prior office actions, disclosed setting the ringing characteristics of a mobile device based on a schedule. Therefore, Rydbeck and Perry showed determining an event start and end time, and if an event time had occurred, associating a ringing characteristic and changing the characteristic during the time. Rydbeck and Pierry however fail to teach finding a notification characteristic associated with the start time and determining if the notification characteristic is different from a prevent notification characteristic and if notifications are different, modifying the notification characteristic during the event and saving the prevent notification characteristic.
